Dear Long Island Power Authority Commission

I hope this letter finds you well. I am writing to express my strong opposition to the full municipalization of the Long Island Power Authority (LIPA). As a concerned citizen and a supporter of local small businesses, I am deeply appreciative of the excellent work that PSEG-Long Island (PSEG-LI) has done in supporting our community. It is my belief that the current partnership between LIPA and PSEG-LI has been instrumental in fostering the growth and success of small businesses on Long Island.

One of the key reasons for my opposition to the full municipalization of LIPA is the exceptional support that PSEG-LI has provided to small businesses in our region. Over the years, PSEG-LI has demonstrated a deep understanding of the unique challenges faced by small businesses and has worked tirelessly to address their needs. Through various programs and initiatives, PSEG-LI has offered valuable resources, energy efficiency incentives, and technical expertise, enabling small businesses to reduce costs, enhance sustainability, and remain competitive.

The partnership between LIPA and PSEG-LI has resulted in the implementation of several successful initiatives geared towards small businesses. For instance, the Small Business Efficiency Program has provided financial assistance and technical support to help businesses upgrade their lighting, HVAC systems, and other energy-consuming equipment. This has not only reduced energy consumption but has also significantly lowered operating costs for small businesses, allowing them to invest in growth and job creation.

Additionally, PSEG-LI's commitment to renewable energy has been instrumental in helping small businesses transition to cleaner and more sustainable practices. The Green Business Program has empowered local enterprises to adopt environmentally friendly measures, such as solar panels, energy-efficient appliances, and electric vehicle charging stations. This has not only helped small businesses reduce their carbon footprint but has also attracted environmentally conscious customers, enhancing their marketability and reputation.

Furthermore, PSEG-LI's proactive approach to emergency response and outage restoration has been invaluable for small businesses, particularly during severe weather events. Their swift and

efficient actions have minimized downtime and economic losses, enabling businesses to quickly resume operations and serve their customers. The expertise and resources that PSEG-LI brings to the table have proven essential in ensuring the resilience and reliability of our power supply, which is crucial for the survival and success of our small business community.

In conclusion, I firmly believe that the partnership between LIPA and PSEG-LI has been a driving force behind the growth and prosperity of small businesses on Long Island. The exceptional support, resources, and expertise provided by PSEG-LI have empowered local enterprises, reduced costs, and enhanced sustainability. Fully municipalizing LIPA may disrupt this successful collaboration, potentially hindering the progress and support that small businesses currently enjoy.

I urge the Long Island Power Authority Legislative Commission to consider the tremendous impact that PSEG-LI has had on our small business community. I implore you to explore alternative solutions that build upon the existing partnership, allowing for the continued success and growth of our local enterprises.

Thank you for your time and consideration.

Sincerely,

A handwritten signature in cursive script, reading "Yvonne Amurgo", written over a horizontal line.

I hope this letter finds you well. I am writing to express my strong opposition to the full municipalization of the Long Island Power Authority (LIPA). As a concerned citizen and a supporter of local small businesses, I am deeply appreciative of the excellent work that PSEG-Long Island (PSEG-LI) has done in supporting our community. It is my belief that the current partnership between LIPA and PSEG-LI has been instrumental in fostering the growth and success of small businesses on Long Island.

One of the key reasons for my opposition to the full municipalization of LIPA is the exceptional support that PSEG-LI has provided to small businesses in our region. Over the years, PSEG-LI has demonstrated a deep understanding of the unique challenges faced by small businesses and has worked tirelessly to address their needs. Through various programs and initiatives, PSEG-LI has offered valuable resources, energy efficiency incentives, and technical expertise, enabling small businesses to reduce costs, enhance sustainability, and remain competitive.

The partnership between LIPA and PSEG-LI has resulted in the implementation of several successful initiatives geared towards small businesses. For instance, the Small Business Efficiency Program has provided financial assistance and technical support to help businesses upgrade their lighting, HVAC systems, and other energy-consuming equipment. This has not only reduced energy consumption but has also significantly lowered operating costs for small businesses, allowing them to invest in growth and job creation.

Additionally, PSEG-LI's commitment to renewable energy has been instrumental in helping small businesses transition to cleaner and more sustainable practices. The Green Business Program has empowered local enterprises to adopt environmentally friendly measures, such as

solar panels, energy-efficient appliances, and electric vehicle charging stations. This has not only helped small businesses reduce their carbon footprint but has also attracted environmentally conscious customers, enhancing their marketability and reputation.

Furthermore, PSEG-LI's proactive approach to emergency response and outage restoration has been invaluable for small businesses, particularly during severe weather events. Their swift and efficient actions have minimized downtime and economic losses, enabling businesses to quickly resume operations and serve their customers. The expertise and resources that PSEG-LI brings to the table have proven essential in ensuring the resilience and reliability of our power supply, which is crucial for the survival and success of our small business community.

In conclusion, I firmly believe that the partnership between LIPA and PSEG-LI has been a driving force behind the growth and prosperity of small businesses on Long Island. The exceptional support, resources, and expertise provided by PSEG-LI have empowered local enterprises, reduced costs, and enhanced sustainability. Fully municipalizing LIPA may disrupt this successful collaboration, potentially hindering the progress and support that small businesses currently enjoy.

I urge the Long Island Power Authority Legislative Commission to consider the tremendous impact that PSEG-LI has had on our small business community. I implore you to explore alternative solutions that build upon the existing partnership, allowing for the continued success and growth of our local enterprises.

Thank you for your time and consideration.

Sincerely,

A handwritten signature in black ink that reads "Joe J. Suzman" followed by a stylized monogram "JSR".

Their swift and efficient actions have minimized downtime and economic losses, enabling businesses to quickly resume operations and serve their customers. The expertise and resources that PSEG-LI brings to the table have proven essential in ensuring the resilience and reliability of our power supply, which is crucial for the survival and success of our small business community.

In conclusion, I firmly believe that the partnership between LIPA and PSEG-LI has been a driving force behind the growth and prosperity of small businesses on Long Island. The exceptional support, resources, and expertise provided by PSEG-LI have empowered local enterprises, reduced costs, and enhanced sustainability. Fully municipalizing LIPA may disrupt this successful collaboration, potentially hindering the progress and support that small businesses currently enjoy.

I urge the Long Island Power Authority Legislative Commission to consider the tremendous impact that PSEG-LI has had on our small business community. I implore you to explore alternative solutions that build upon the existing partnership, allowing for the continued success and growth of our local enterprises.

Thank you for your time and consideration.

Sincerely,

Kristen Mendez

Dear _____],

I hope this letter finds you well. I am writing to express my strong opposition to the full municipalization of the Long Island Power Authority (LIPA). As a concerned citizen and a supporter of local small businesses, I am deeply appreciative of the excellent work that PSEG-Long Island (PSEG-LI) has done in supporting our community. It is my belief that the current partnership between LIPA and PSEG-LI has been instrumental in fostering the growth and success of small businesses on Long Island.

One of the key reasons for my opposition to the full municipalization of LIPA is the exceptional support that PSEG-LI has provided to small businesses in our region. Over the years, PSEG-LI has demonstrated a deep understanding of the unique challenges faced by small businesses and has worked tirelessly to address their needs. Through various programs and initiatives, PSEG-LI has offered valuable resources, energy efficiency incentives, and technical expertise, enabling small businesses to reduce costs, enhance sustainability, and remain competitive.

The partnership between LIPA and PSEG-LI has resulted in the implementation of several successful initiatives geared towards small businesses. For instance, the Small Business Efficiency Program has provided financial assistance and technical support to help businesses upgrade their lighting, HVAC systems, and other energy-consuming equipment. This has not only reduced energy consumption but has also significantly lowered operating costs for small businesses, allowing them to invest in growth and job creation.

Additionally, PSEG-LI's commitment to renewable energy has been instrumental in helping small businesses transition to cleaner and more sustainable practices. The Green Business Program has empowered local enterprises to adopt environmentally friendly measures, such as solar panels, energy-efficient appliances, and electric vehicle charging stations. This has not only helped small businesses reduce their carbon footprint but has also attracted environmentally conscious customers, enhancing their marketability and reputation.

Furthermore, PSEG-LI's proactive approach to emergency response and outage restoration has been invaluable for small businesses, particularly during severe weather events. Their swift and

efficient actions have minimized downtime and economic losses, enabling businesses to quickly resume operations and serve their customers. The expertise and resources that PSEG-LI brings to the table have proven essential in ensuring the resilience and reliability of our power supply, which is crucial for the survival and success of our small business community.

In conclusion, I firmly believe that the partnership between LIPA and PSEG-LI has been a driving force behind the growth and prosperity of small businesses on Long Island. The exceptional support, resources, and expertise provided by PSEG-LI have empowered local enterprises, reduced costs, and enhanced sustainability. Fully municipalizing LIPA may disrupt this successful collaboration, potentially hindering the progress and support that small businesses currently enjoy.

Additionally, PSEG-LI's commitment to renewable energy has been instrumental in helping small businesses transition to cleaner and more sustainable practices. The Green Business Program has empowered local enterprises to adopt environmentally friendly measures, such as solar panels, energy-efficient appliances, and electric vehicle charging stations. This has not only helped small businesses reduce their carbon footprint but has also attracted environmentally conscious customers, enhancing their marketability and reputation.

Furthermore, PSEG-LI's proactive approach to emergency response and outage restoration has been invaluable for small businesses, particularly during severe weather events. Their swift and

efficient actions have minimized downtime and economic losses, enabling businesses to quickly resume operations and serve their customers. The expertise and resources that PSEG-LI brings to the table have proven essential in ensuring the resilience and reliability of our power supply, which is crucial for the survival and success of our small business community.

In conclusion, I firmly believe that the partnership between LIPA and PSEG-LI has been a driving force behind the growth and prosperity of small businesses on Long Island. The exceptional support, resources, and expertise provided by PSEG-LI have empowered local enterprises, reduced costs, and enhanced sustainability. Fully municipalizing LIPA may disrupt this successful collaboration, potentially hindering the progress and support that small businesses currently enjoy.

I urge the Long Island Power Authority Legislative Commission to consider the tremendous impact that PSEG-LI has had on our small business community. I implore you to explore alternative solutions that build upon the existing partnership, allowing for the continued success and growth of our local enterprises.

Thank you for your time and consideration.

Sincerely,

Long Island Power Authority Legislative Commission

Dear Honorable Members of the LIPA Commission

I hope this letter finds you well. I am writing to express my strong opposition to the full municipalization of the Long Island Power Authority (LIPA). As a concerned citizen and a supporter of local small businesses, I am deeply appreciative of the excellent work that PSEG-Long Island (PSEG-LI) has done in supporting our community. It is my belief that the current partnership between LIPA and PSEG-LI has been instrumental in fostering the growth and success of small businesses on Long Island.

One of the key reasons for my opposition to the full municipalization of LIPA is the exceptional support that PSEG-LI has provided to small businesses in our region. Over the years, PSEG-LI has demonstrated a deep understanding of the unique challenges faced by small businesses and has worked tirelessly to address their needs. Through various programs and initiatives, PSEG-LI has offered valuable resources, energy efficiency incentives, and technical expertise, enabling small businesses to reduce costs, enhance sustainability, and remain competitive.

The partnership between LIPA and PSEG-LI has resulted in the implementation of several successful initiatives geared towards small businesses. For instance, the Small Business Efficiency Program has provided financial assistance and technical support to help businesses upgrade their lighting, HVAC systems, and other energy-consuming equipment. This has not only reduced energy consumption but has also significantly lowered operating costs for small businesses, allowing them to invest in growth and job creation.

Additionally, PSEG-LI's commitment to renewable energy has been instrumental in helping small businesses transition to cleaner and more sustainable practices. The Green Business Program has empowered local enterprises to adopt environmentally friendly measures, such as

solar panels, energy-efficient appliances, and electric vehicle charging stations. This has not only helped small businesses reduce their carbon footprint but has also attracted environmentally conscious customers, enhancing their marketability and reputation.

Furthermore, PSEG-LI's proactive approach to emergency response and outage restoration has been invaluable for small businesses, particularly during severe weather events. Their swift and efficient actions have minimized downtime and economic losses, enabling businesses to quickly resume operations and serve their customers. The expertise and resources that PSEG-LI brings to the table have proven essential in ensuring the resilience and reliability of our power supply, which is crucial for the survival and success of our small business community.

In conclusion, I firmly believe that the partnership between LIPA and PSEG-LI has been a driving force behind the growth and prosperity of small businesses on Long Island. The exceptional support, resources, and expertise provided by PSEG-LI have empowered local enterprises, reduced costs, and enhanced sustainability. Fully municipalizing LIPA may disrupt this successful collaboration, potentially hindering the progress and support that small businesses currently enjoy.

I urge the Long Island Power Authority Legislative Commission to consider the tremendous impact that PSEG-LI has had on our small business community. I implore you to explore alternative solutions that build upon the existing partnership, allowing for the continued success and growth of our local enterprises.

Thank you for your time and consideration.

Sincerely,

Edgór Ricardo Bogel

efficient actions have minimized downtime and economic losses, enabling businesses to quickly resume operations and serve their customers. The expertise and resources that PSEG-LI brings to the table have proven essential in ensuring the resilience and reliability of our power supply, which is crucial for the survival and success of our small business community.

In conclusion, I firmly believe that the partnership between LIPA and PSEG-LI has been a driving force behind the growth and prosperity of small businesses on Long Island. The exceptional support, resources, and expertise provided by PSEG-LI have empowered local enterprises, reduced costs, and enhanced sustainability. Fully municipalizing LIPA may disrupt this successful collaboration, potentially hindering the progress and support that small businesses currently enjoy.

I urge the Long Island Power Authority Legislative Commission to consider the tremendous impact that PSEG-LI has had on our small business community. I implore you to explore alternative solutions that build upon the existing partnership, allowing for the continued success and growth of our local enterprises.

Thank you for your time and consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Harold A. Barzaga", is written over a horizontal line. The signature is fluid and cursive, with a long, sweeping tail that extends to the right.
