

Reimagine LIIPA hearing on 9/14, 10 AM, at  
1550 Franklin Ave

Mr. JOSEPH M. TONINI  
103 Skelly Place  
Mineola, NY 11501

My name is Joseph Tonini. I am a resident of Mineola, a grandfather of six, four of whom live on Long Island, and a Long Island Power Authority ratepayer. I support the work of the LIIPA Commission to find a better model for delivering the electrical power we need on Long Island.

As a 40 year resident of the Island, I can attest to the poor management that PSEG has provided, especially during Superstorm Sandy and Tropical Storm Isaias.

I am an enthusiastic advocate for renewable energy. The wind blows consistently and powerfully off the shores of Long Island, and I firmly believe that offshore wind farms can deliver the power we need cheaper, safer and more cleanly than is currently the case; and help to sustain and improve the economy of the Island by providing good paying jobs.

On behalf of my four Long Island grandchildren (and with a fifth on the way in less than two months) I urge this Commission to imagine, and to develop a better LIIPA. One that is more democratic, responsive and responsible.

Thank you for your consideration of this testimony.
